| | |

| Product | Application |
|--------------------------|---------------------|
| 1120 nm Broad Area Laser | Material Processing |
| mounted on C-Mount | |
| | |

Absolute Maximum Ratings

| | Symbol | Unit | min | typ | max |
|---------------------------------|------------------|------|-----|-----|-----|
| Storage Temperature | Ts | °C | -40 | | 85 |
| Operational Temperature at Case | T _c | °C | -20 | | 50 |
| Forward Current | I _F | А | | | 3.5 |
| Reverse Voltage | V _R | V | | | 0 |
| Output Power | P _{opt} | W | | | 1.6 |

Recommended Operational Conditions

| | Symbol | Unit | min | typ | max |
|---------------------------------|------------------|------|-----|-----|-----|
| Operational Temperature at Case | T _C | °C | 10 | | 25 |
| Forward Current | I _F | А | | | 3.0 |
| Output Power | P _{opt} | W | | | 1.5 |

Characteristics at T_{LD} = 20 °C at Begin Of Life

| Parameter | Symbol | Unit | min | typ | max |
|--|------------------|--------|------|------|------|
| Center Wavelength | λ_{C} | nm | 1115 | 1120 | 1125 |
| Spectral Width (FWHM) | Δλ | nm | | | 5 |
| Temperature Coefficient of Wavelength | dλ / dT | nm / K | | 0.4 | |
| Output Power @ I _F = 3.0 A | P _{opt} | W | 1.5 | | |
| Slope Efficiency | η_{d} | W / A | 0.7 | 0.8 | |
| Threshold Current | I _{th} | А | | 0.4 | 0.50 |
| Operational Current @ P _{opt} = 1.5 W | I _{op} | А | | | 3.0 |
| Stripe Width | Ws | μm | | 100 | |
| Cavity Length | L | μm | | 2000 | |

Measurement Conditions / Comments

Stress in excess of the Absolute Maximum Ratings can

cause permanent damage to the device.

Unpacking, Installation and Laser Safety

Unpacking the laser diodes should only be done at electrostatic safe workstations (EPA). Though protection against electro static discharge (ESD) is implemented in the laser package, charges may occur at surfaces. Please store this product in its original package at a dry, clean place until final use. During device installation, ESD protection has to be maintained.

The BAL diode type is known to be sensitive against thermal stress. Operating at moderate temperatures on propper heat sinks will contribute to a long lifetime of the diode.

The laser emission from this diode is close to the invisible infrared region of the electromagnetic spectrum. Avoid direct and/or indirect exposure to the free running beam. Collimating the free running beam with optics as common in optical instruments will increase threat to the human eye.

Each laser diode will come with an individual test protocol verifying the parameters given in this document.
