### **MULTI MODE LASER DIODES Broad Area Laser**

General Product Information				
Product	Application			
808 nm Broad Area Laser	Sensing			
for High Energy Pulse Mode Operation				

#### Absolute Maximum Ratings

Parameter	Symbol	Unit	min	typ	max
Storage Temperature	Ts	°C	-40		85
Operational Temperature at Case	T <sub>C</sub>	°C	-40		85
Peak Current	I <sub>F Peak</sub>	А			22
Reverse Voltage	V <sub>R</sub>	V			2
Peak Output Power	P <sub>opt Peak</sub>	W			22
Forward Voltage at Peak	V <sub>F</sub>	V			4

#### **Recommended Operational Conditions**

Parameter	Symbol	Unit	min	typ	max
Operational Temperature at Case	T <sub>C</sub>	°C	0		75
Forward Current	I <sub>F Peak</sub>	А			21
Output Power	P <sub>opt Peak</sub>	W		20

#### Typical Measurement Results

Performance figures, data and any illustrative material provided in this specification are typical and must be specifically confirmed in writing by eagleyard Photonics before they become applicable to any particular order or contract. In accordance with the eagleyard Photonics policy of continuous improvement specifications may change without notice.

#### Unpacking, Installation and Laser Safety

Unpacking the laser diodes should only be done at electrostatic safe workstations (EPA). Though protection against electro static discharge (ESD) is implemented in the laser package, charges may occur at surfaces. Please store this product in its original package at a dry, clean place until final use. During device installation, ESD protection has to be maintained.

The BAL diode type is known to be sensitive against thermal stress. Operating at moderate temperatures on propper heat sinks will contribute to a long lifetime of the diode.

The laser emission from this diode is close to the invisible infrared region of the electromagnetic spectrum. Avoid direct and/or indirect exposure to the free running beam. Collimating the free running beam with optics as common in optical instruments will increase threat to the human eye.

Each laser diode will come with an individual test protocol verifying the parameters given in this document.
